This listing of the claims will replace all prior versions, and listings, of the claims in the present application

Listing of the claims

Claim 11. (Previously Presented) A process for making a liquid dishwashing detergent composition wherein said final composition comprises substantially no residual hydrogen peroxide, said process comprising the steps of:

- (a) combining an amine oxide containing residual hydrogen peroxide with an antioxidant to form a detergent premix wherein said premix contains less than 0.02% of hydrogen peroxide; and
- (b) adding an amylase enzyme to said detergent premix to form a detergent composition

wherein said amine oxide has the formula:

wherein R₁ is C₈-C₁₈ alkyl, 2-hydroxyalkyl, 3-hydroxyalkyl, 3-alkoxy-2-hydroxypropyl and mixtures thereof; R₂ and R₃ are each methyl, ethyl, propyl, isopropyl, 2-hydroxyethyl, 2-hydroxypropyl and mixtures thereof.

Claim 12. (Previously Presented) A process according to Claim 11 wherein one or more surfactants are combined with said amine oxide and antioxidant in step (a); further wherein said process comprises one or more adjunct ingredients, said adjunct ingredients being selected from the group consisting of anionic surfactants, amphoteric surfactants, nonionic surfactants, and mixtures thereof.

Claim 13. (Previously Presented) A process according to Claim 11 further comprising the step of adding a chelant, said chelant having a calcium ion binding constant, log K, of less than 3.

Claim 15. (Original) A process for making a liquid dishwashing detergent composition wherein said final composition comprises substantially no residual hydrogen peroxide, said process comprising the steps of:

- (a) combining an amine oxide containing residual hydrogen peroxide with an antioxidant to form a detergent premix wherein said premix contains less than 0.02% of hydrogen peroxide;

- (b) adding to said premix one or more adjunct ingredients to form an adjunct ingredient comprising detergent premix; and
- (c) adding an amylase enzyme to said adjunct ingredient comprising detergent premix to form a detergent composition.

Claim 16. (Original) A process according to Claim 15 wherein one or more surfactants are combined with said amine oxide and antioxidant in step (a), said adjunct ingredients selected from the group consisting of anionic surfactants, amphoteric surfactants, nonionic surfactants, and mixtures thereof.

Claim 17. (Previously Presented) A process according to claim 15 further comprising the step of adding a chelant, said chelant having a calcium ion binding constant, $\log K$, of less than 3.

Claim 18. (Original) A process according to Claim 15, wherein said adjunct ingredients from step (b) are selected from the group consisting of soil release polymers, polymeric dispersants, polysaccharides, abrasives, bactericides and other antimicrobials, tarnish inhibitors, builders, enzymes, dyes, buffers, antifungal or mildew control agents, insect repellants, perfumes, hydrotropes, thickeners, processing aids, brighteners, anti-corrosive aids, stabilizers, chelants, and mixtures thereof.

Claim 19. (Original) A process according to Claim 15 wherein said detergent composition comprises a sufficient amount of a buffer such that said composition during use has a pH of greater than about 7.

Claim 20. (Original) A process according to Claim 19 comprising from about 0.1% to about 15% by weight, of a buffer.

Claim 21. (Original) A process according to Claim 20 comprising from 1% to 10% by weight, of a buffer.

Claim 22. (Original) A process according to Claim 21 comprising from 2% to 8% by weight, of a buffer.

Claim 23. (Original) A process according to Claim 15 wherein said detergent premix further comprises a buffering system, said system comprising:

- i) 0.5% by weight, of the final composition, of an amine selected from the group consisting of tri(hydroxymethyl) amino methane, 2-amino-2-ethyl-1,3 propanediol, 2-amino-2-methylpropanol, 2-amino-2-methyl-1,3-propanol, disodium glutamate, N-methyl diethanolamide, 1,3-diaminopropanol, N,N'-tetramethyl-1,3-diamino-2-propanol, N,N-bis(2-hydroxyethyl)glycine, N-tris(hydroxymethyl)methyl glycine, and mixtures thereof;
